The Basic Laws of Human Stupidity

The basic laws assert that Cipolla and Taleb (2021)

- 1. There will always be more stupid people than you think
- 2. The proportion of stupid people is invariant to intellectual, social or geographic segmentation
- 3. A stupid person is a person who causes losses to another person or to a group of persons while himself deriving no gain and possibly incurring losses
- 4. Non-stupid people always underestimate the damaging power of stupid individuals
